TRANSPUTEC

EDITORIAL ROADMAP · OCT 2026

The next ten reports.

What the evidence supports, what fits Transputec, and the order to publish in.

TRANSPUTEC RESEARCH · INTERNAL

SAMPLE EDITION

HOW WE CHOSE

Three questions. Ten topics.

We screened a long list against what we could read at source, not what we could find in a search snippet.

01

Evidence

Is there a primary source we can read in full? Government and regulator data beat vendor surveys; vendor telemetry beats a vendor poll.

02

Fit

Does it connect to something Transputec does and can prove: Microsoft Modern Work and Security, ISO 27001 delivery, Copilot consulting, backup and recovery, device lifecycle.

03

Timing

Is there a news event or a deadline that makes someone read it this quarter?

WHAT WE FOUND

Six topics have a statistic we read on the source page or PDF. Two rest on vendor surveys and are labelled as such. Two have no UK business figure we can stand behind, and are marked **Research**: they need original work before anyone reads them.

OUR STANDARD

A number goes in a report only if we can name the source, the sample, the date and who paid for it. A claim we could not verify is flagged, softened or left out. A topic without a defensible headline is not published; it is researched first.

THE MAP

Where each idea sits.

Our judgement on a five-point scale, based on what we could verify and how closely each topic matches Transputec's services. Numbers match the pages that follow.

READING IT

The top-right corner is where a report is both credible and commercially useful. Idea 9 has the right fit and the wrong evidence today; the fix is to run our own survey, not to borrow someone else's number.

THE SHORTLIST

Ten working titles.

Titles are drafts. Status shows where each stands as of 27 October 2026.

	WORKING TITLE	TOPIC	STATUS
01	The Token Problem	Microsoft 365 identity attacks	BUILT
02	The 55%	Ransomware recovery and backups	BUILT
03	Your MSP Is About to Be Regulated	Cyber Security and Resilience Bill	BUILT
04	What Copilot Can See	Copilot readiness and oversharing	BUILT
05	Negative Seven	Time to exploit	NEXT
06	The Supplier Blind Spot	Third-party and supply-chain risk	NEXT
07	Ready, Not Willing	Mid-market AI adoption and skills	LATER
08	What Insurers Now Ask	Cyber insurance and claims	LATER
09	Green Dashboard, Red Users	Experience-level agreements	RESEARCH
10	The Hidden Footprint	Sustainable IT and device lifecycle	RESEARCH

PITCHES · 01–02

The Token Problem and The 55%.

01

BUILT

The Token Problem

MICROSOFT 365 IDENTITY ATTACKS

AiTM phishing is 44.6% of identified phishing techniques; password attacks fell 26% year on year.

Microsoft Digital Defense Report 2026 (Microsoft telemetry)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
IT and security leaders on Microsoft 365	Modern Work and Security partner; managed identity	4.2 · 4.6 out of 5

02

BUILT

The 55%

RANSOMWARE RECOVERY AND BACKUPS

78% of UK victims recovered from backups, up from 39%; only 55% were fully back within a week.

Sophos State of Ransomware in the UK 2026 (UK n=120, vendor-commissioned)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
MDs, finance and IT leaders	Backup, DR and restore testing	3.8 · 4.3 out of 5

PITCHES · 03–04

Your MSP Is About to Be Regulated and What Copilot Can See.

03

BUILT

Your MSP Is About to Be Regulated

CYBER SECURITY AND RESILIENCE BILL

The Bill extends network and information systems rules to managed service providers. It passed the Commons on 16 June 2026.

UK Parliament; Digital Policy Alert

READER	TRANSPUTEC LINK	EVIDENCE · FIT
Anyone buying managed IT	ISO 27001 delivery; customer incident notification	3.4 · 4.9 out of 5

04

BUILT

What Copilot Can See

COPILOT READINESS AND OVERSHARING

56% have Copilot fully deployed, up from 29%; 77% had a Microsoft 365 governance incident.

ShareGate State of Microsoft 365 2026 (vendor survey)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
IT and finance leaders planning Copilot	Microsoft Copilot consulting	3.0 · 4.8 out of 5

PITCHES · 05–06

Negative Seven and The Supplier Blind Spot.

05

NEXT

Negative Seven

TIME TO EXPLOIT

Mean time-to-exploit is estimated at minus seven days: attacks begin before a patch exists.

Mandiant M-Trends 2026 (500,000+ investigation hours)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
IT leaders; pairs with the PHP2Shell case study	Patching, vulnerability management, pen testing	3.9 · 4.0 out of 5

06

NEXT

The Supplier Blind Spot

THIRD-PARTY AND SUPPLY-CHAIN RISK

Only 15% of UK businesses review immediate suppliers: 30% of medium and 48% of large.

Cyber Security Breaches Survey 2025/26 (government, n=2,112 businesses)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
Procurement, risk and finance	Supplier assurance, G-Cloud and TePAS credentials	4.6 · 3.6 out of 5

PITCHES · 07–08

Ready, Not Willing and What Insurers Now Ask.

07

LATER

Ready, Not Willing

MID-MARKET AI ADOPTION AND SKILLS

23% of mid-sized UK firms use AI, and 64% of those users say skills are the brake.

DSIT AI Adoption Research (fieldwork Feb to May 2025: refresh before use)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
MDs and HR leaders	Copilot training and adoption	3.5 · 3.4 out of 5

08

LATER

What Insurers Now Ask

CYBER INSURANCE AND CLAIMS

Marsh UK logged a record 668 claims notifications in 2025; ransomware encryption fell from 70% of extortion claims to 24%.

Marsh UK claims trends 2025 (broker's own book)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
Finance directors	Cyber Essentials Plus, controls evidence	3.2 · 3.0 out of 5

PITCHES · 09–10

Green Dashboard, Red Users and The Hidden Footprint.

09

RESEARCH

Green Dashboard, Red Users

EXPERIENCE-LEVEL AGREEMENTS

No verifiable statistic found. The honest version needs original research.

Proposal: survey Transputec clients and prospects

READER	TRANSPUTEC LINK	EVIDENCE · FIT
IT leaders and service owners	XLA service desk; fixed-fee model	1.2 · 4.2 out of 5

10

RESEARCH

The Hidden Footprint

SUSTAINABLE IT AND DEVICE LIFECYCLE

62 million tonnes of e-waste in 2022; only 22.3% documented as recycled. UK business data still to source.

UNITAR and ITU Global E-waste Monitor 2024 (global)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
Sustainability and procurement leads	Device lifecycle, ISO 14001, ITAD	2.0 · 3.2 out of 5

THE PLAN

A quarter, in four moves.

WEEKS 1-2
Publish

Identity, Recovery, Resilience Bill and Copilot reports. Pair each with a one-page LinkedIn summary and a playbook play.

WEEKS 3-6
Verify and build

Read Verizon DBIR and Gartner at source. Re-check the ABI claims figure. Build ideas 5 and 6.

WEEKS 7-10
Commission

Field a short client and prospect survey for ideas 9 and 7. Pull UK figures for idea 10.

WEEKS 11-13
Refresh

Update the first four with new data. Retire anything a newer source supersedes.

DECISION

Which of the six unbuilt ideas should go next, and do you want to fund the client survey for idea 9?

OUR STANDARD

Six rules that protect the brand.

01

Name the source

Publisher, date, sample, and who paid for it, on the page.

02

Keep studies apart

Two surveys from one vendor are two surveys.

03

Label opinion

Our view is marked as ours.

04

Flag the gaps

If we could not read it, we say so.

05

No invented people

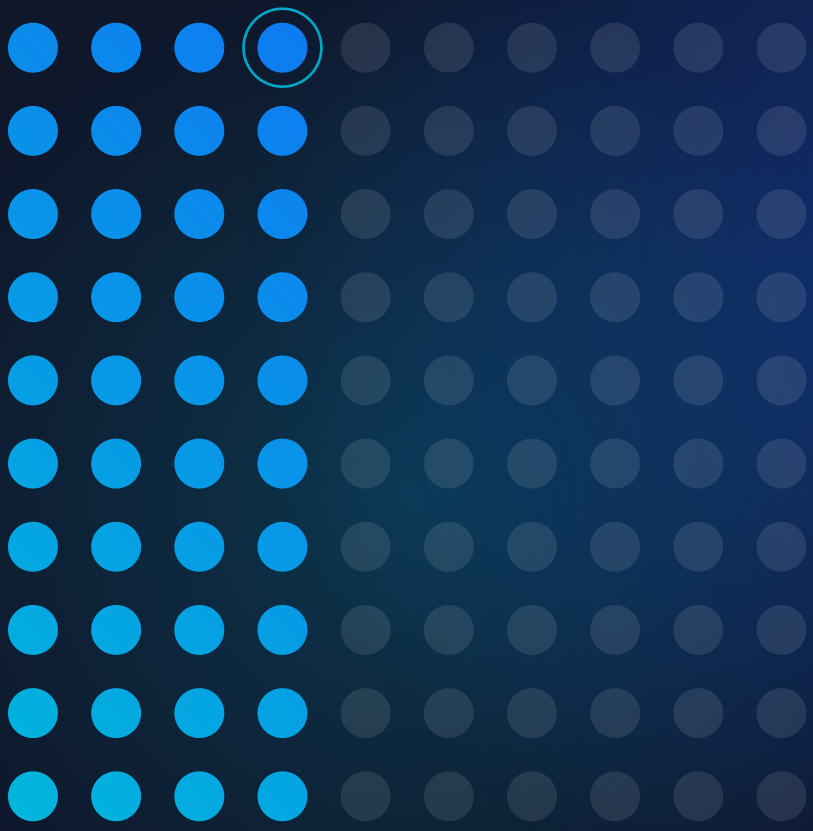

No made-up quotes, names or case studies.

06

Refresh or retire

Old data is dated on the page, then replaced.

These are the rules used on every document in this series, including the four built in this batch.

4 OF 10 BUILT · 6 TO GO

TRANSPUTEC

Predictable IT. Predictable budget.
Contracted outcomes.
