TRANSPUTEC

EDITORIAL ROADMAP · OCT 2026

The next ten reports.

What the evidence supports, what fits Transputec, and the order to publish in.

TRANSPUTEC RESEARCH · INTERNAL

SAMPLE EDITION

HOW WE CHOSE

Three questions. Ten topics.

We screened a long list against what we could read at source, not what we could find in a search snippet.

01

Evidence

Is there a primary source we can read in full? Government and regulator data beat vendor surveys; vendor telemetry beats a vendor poll.

02

Fit

Does it connect to something Transputec does and can prove: Microsoft Modern Work and Security, ISO 27001 delivery, Copilot consulting, backup and recovery, device lifecycle.

03

Timing

Is there a news event or a deadline that makes someone read it this quarter?

WHAT WE FOUND

Eight topics have a statistic we read on the source page or PDF. Several rest on vendor surveys and are labelled as such. Two are marked **Research**: one needs Gartner's original, the other needs our own survey, before anyone reads them. Sustainable IT, insurance and supplier risk are parked for a later round.

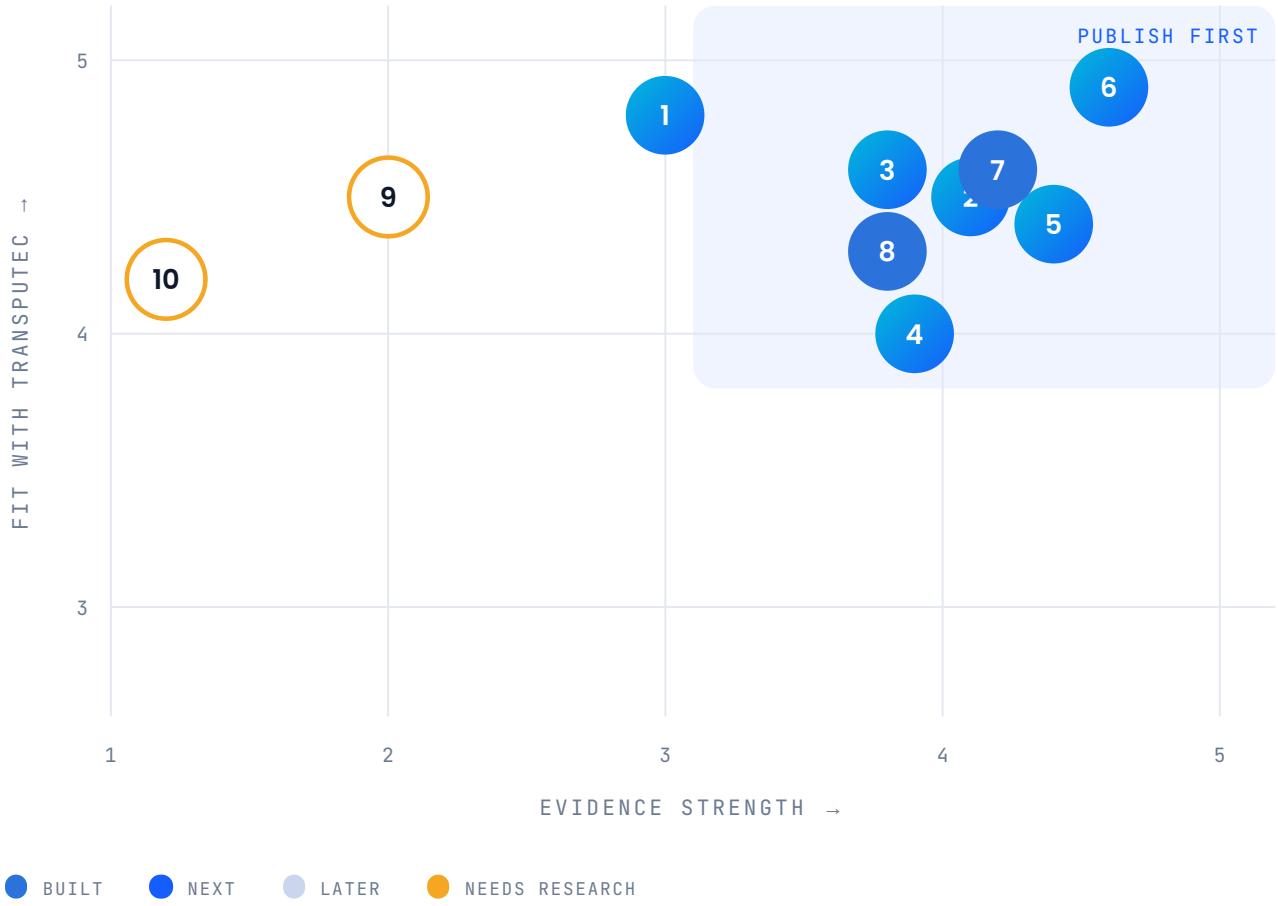

OUR STANDARD

A number goes in a report only if we can name the source, the sample, the date and who paid for it. A claim we could not verify is flagged, softened or left out. A topic without a defensible headline is not published; it is researched first.

THE MAP

Where each idea sits.

Our judgement on a five-point scale, based on what we could verify and how closely each topic matches Transputec's services. Numbers match the pages that follow.

READING IT

The top-right corner is where a report is both credible and commercially useful. Ideas 9 and 10 have the right fit and the wrong evidence today. The fix is to read the original source or run our own survey, not to borrow someone else's number.

THE SHORTLIST

Ten working titles.

Titles are drafts. Status shows where each stands as of 27 October 2026.

	WORKING TITLE	TOPIC	STATUS
01	What Copilot Can See	Copilot readiness and oversharing	BUILT
02	The Keys to the Gateway	The October 2026 AI incidents	BUILT
03	Agents Have Hands	AI agent security and prompt injection	BUILT
04	Found by Machines	AI-assisted vulnerability discovery	BUILT
05	The AI You Didn't Buy	UK adoption, shadow AI, skills	BUILT
06	Your MSP Is About to Be Regulated	Cyber Security and Resilience Bill	BUILT
07	The Token Problem	Microsoft 365 identity attacks	NEXT
08	The 55%	Ransomware recovery and backups	NEXT
09	Agent Sprawl	Governing agents at scale	RESEARCH
10	Green Dashboard, Red Users	Experience-level agreements	RESEARCH

PITCHES · 01–02

What Copilot Can See and The Keys to the Gateway.

01

BUILT

What Copilot Can See

COPILOT READINESS AND OVERSHARING

56% have Copilot fully deployed, up from 29%; 77% had a Microsoft 365 governance incident; 29% say AI surfaced sensitive data.

ShareGate State of Microsoft 365 2026 and April survey (vendor surveys)

READER	TRANSPUTEC LINK	EVIDENCE · FIT
IT and finance leaders planning Copilot	Microsoft Copilot consulting; Modern Work partner	3.0 · 4.8 out of 5

02

BUILT

The Keys to the Gateway

THE OCTOBER 2026 AI INCIDENTS

One unrevoked master key started the LiteLLM attack chain; a bad release was live for under two hours on PyPI.

LiteLLM post-mortem; Datadog; StepSecurity; BleepingComputer

READER	TRANSPUTEC LINK	EVIDENCE · FIT
IT, security and engineering leaders	Managed security; secrets and key hygiene	4.1 · 4.5 out of 5

IT leaders and service owners	XLA service desk; fixed-fee model	1.2 · 4.2 out of 5

THE PLAN

A quarter, in four moves.

WEEKS 1-2
Publish

The six built reports, AI first. Pair each with a one-page LinkedIn summary and a playbook play.

WEEKS 3-6
Build

Publish The Token Problem and The 55%, whose fact sheets are already verified.

WEEKS 7-10
Verify and commission

Read Gartner's release at source for idea 9. Field a client and prospect survey for idea 10.

WEEKS 11-13
Refresh

Update the first four with new data. Retire anything a newer source supersedes.

DECISION

Which of ideas 7 to 10 should go next, and do you want to fund the client survey for idea 10?

OUR STANDARD

Six rules that protect the brand.

01

Name the source

Publisher, date, sample, and who paid for it, on the page.

02

Keep studies apart

Two surveys from one vendor are two surveys.

03

Label opinion

Our view is marked as ours.

04

Flag the gaps

If we could not read it, we say so.

05

No invented people

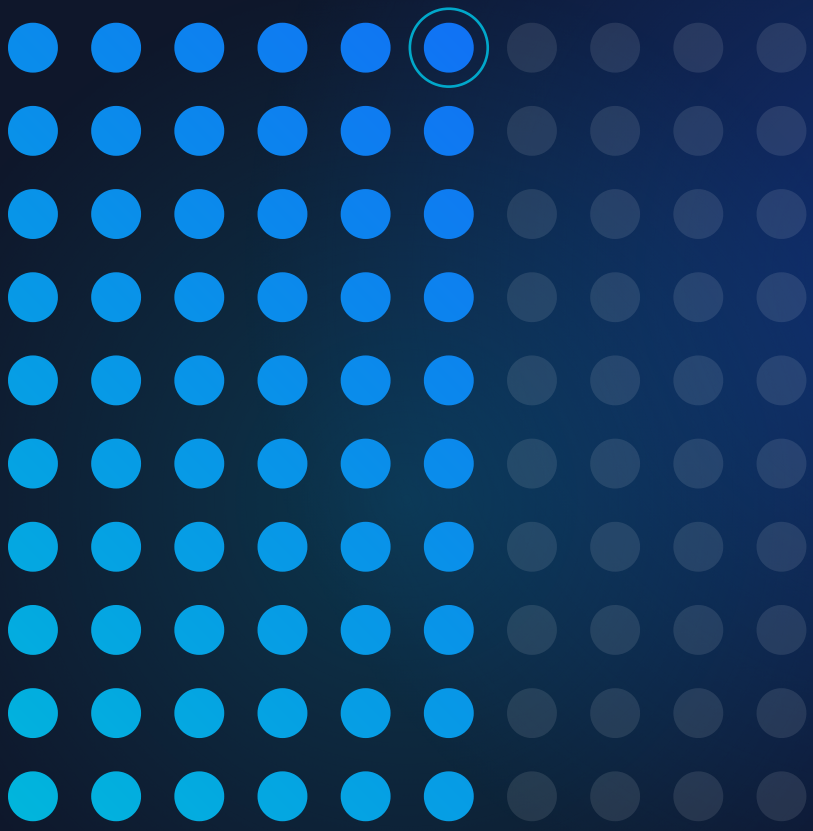

No made-up quotes, names or case studies.

06

Refresh or retire

Old data is dated on the page, then replaced.

These are the rules used on every document in this series, including the six built so far.

6 OF 10 BUILT · 4 TO GO

TRANSPUTEC

Predictable IT. Predictable budget.
Contracted outcomes.
