TRANSPUTEC

LINKEDIN CONTENT PLAYBOOK

November 2026

Five weeks. Three services. One cost-control story, building to the February webinar.

AWS · FinOps · IT Procurement

Draft for review. Final copy supplied separately.

THE MONTH AT A GLANCE

Calendar

W1	Mon 2 to Fri 6 Nov	AWS	**AWS consultancy vs managed services**	Editorial + optional quote card
W2	Mon 9 to Fri 13 Nov	FINOPS	**Five places your cloud cost hides**	Carousel, 8 slides
W3	Mon 16 to Fri 20 Nov	AWS / FINOPS	**What FinOps actually is**	36s vertical video (muted-safe) + myth vs reality card
W4	Mon 23 to Fri 27 Nov	IT PROCUREMENT	**The real cost of a device fleet**	Editorial + carousel, 7 slides
W5	Mon 30 Nov onward	FINOPS	**Your AWS cost-control checklist**	Carousel, 8 slides

GUARDRAILS

Design rules

COLOURS

Navy #0A0F1A. Blue #2C72DB and #3B8BFF. Grey #AEBACC.

TYPE

Poppins throughout. Semibold headlines, light body.

SIZES

Carousel and single image 1080 x 1350. Video 1080 x 1920 vertical.

COPY

No em dashes. Short sentences. British spelling.

NUMBERS

No figures or stats on the image. They go in the post, with a source.

LOGOS

No third-party product logos. AWS service names as text only.

VIDEO

Reads fully with the sound off. On-screen text throughout.

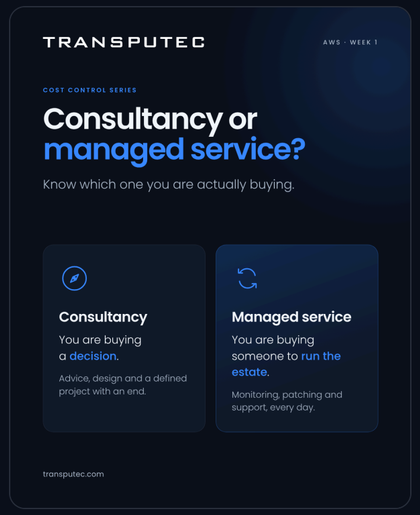

SERIES

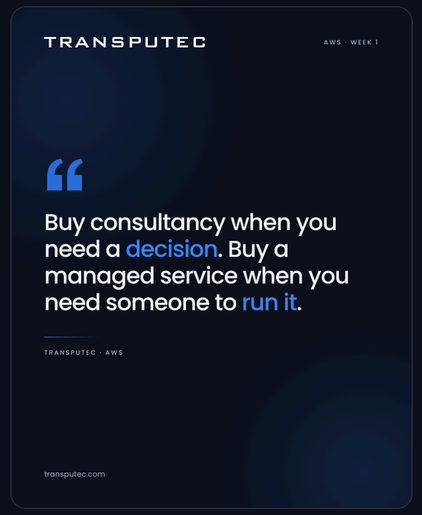

Every asset carries the service and week tag, top right.

WEEK 1 · MON 2 TO FRI 6 NOV · AWS

AWS consultancy vs managed services

Which are you actually buying, a decision, or someone to run the estate? Getting it wrong is common and expensive.

DRAFT POST COPY

Consultancy or managed service? They sound alike. They are not the same purchase.

Consultancy buys you a decision: the right architecture, the right migration path, a plan with an end date.

A managed service buys you someone to run the estate: monitoring, patching and support, every day, against agreed service levels.

Buying one when you needed the other is common, and expensive. Before your next AWS conversation, ask a simple question: do we need a decision, or do we need someone to run it?

#AWS #CloudStrategy #ManagedServices #CloudCosts

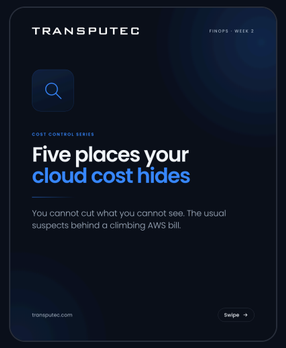

FORMAT · POSTING NOTES

Editorial + optional quote card. Lead with the editorial. Use the quote card as a second post mid-week or as the first comment image.

WEEK 2 · MON 9 TO FRI 13 NOV · FINOPS

Five places your cloud cost hides

You cannot cut what you cannot see. The five usual suspects behind a climbing AWS bill.

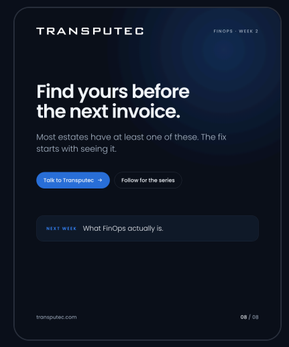

DRAFT POST COPY

You cannot cut what you cannot see.

A climbing AWS bill is rarely one big mistake. It is usually five quiet ones: idle compute, storage nobody deletes, data on the move, forgotten environments and commitments that no longer fit.

Swipe through to see what each looks like, and exactly where to look in your own account.

Which one would you find first?

#FinOps #AWS #CloudCostOptimisation #CloudCosts

FORMAT · POSTING NOTES

Carousel, 8 slides. Upload the PDF as a document post so it swipes. Any figures belong in the caption, with a source.

WEEK 3 · MON 16 TO FRI 20 NOV · AWS / FINOPS

What FinOps actually is

FinOps is not a tool, it is a discipline: visibility, accountability, optimisation and continuous review.

Video: out/w3-finops-explainer-1080x1920.mp4 · 36s · 30fps · muted-safe

DRAFT POST COPY

FinOps is not a tool you buy. It is a discipline your teams practise.

Four parts, one cycle:
Visibility: see where every pound goes.
Accountability: every cost has a named owner.
Optimisation: spend with intent, not by default.
Continuous review: check, adjust, repeat.

Not a project. A habit.

#FinOps #AWS #CloudFinance #CloudGovernance

FORMAT · POSTING NOTES

36s vertical video (muted-safe) + myth vs reality card. Video reads fully with sound off. Add captions file only if a voiceover is added later. Myth vs reality card works as a follow-up post.

WEEK 4 · MON 23 TO FRI 27 NOV · IT PROCUREMENT

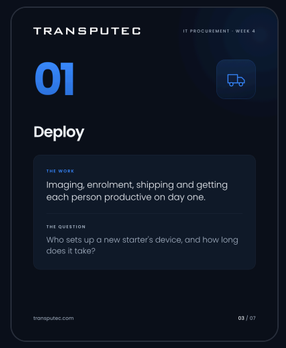

The real cost of a device fleet

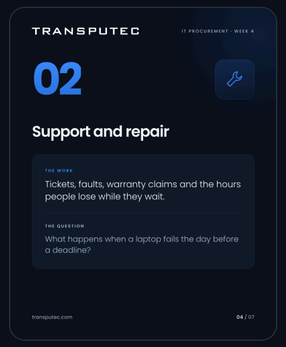

Buying the hardware is the cheap part. The four years after it, running and securing it, are the cost.

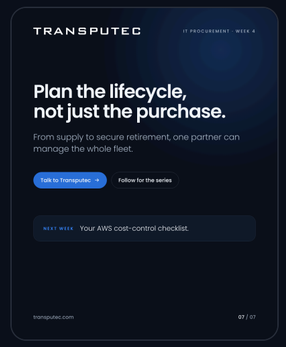

DRAFT POST COPY

The laptop is the cheap part.

The invoice is only day one. After that, every device has to be deployed, supported, secured, repaired and, eventually, retired safely with its data wiped.

That is where the real cost of a fleet lives, and it rarely shows up in the purchase decision.

Plan the lifecycle, not just the purchase. [Offer line to confirm]

#ITProcurement #DeviceLifecycle #EndpointSecurity #ITManagement

FORMAT · POSTING NOTES

Editorial + carousel, 7 slides. CONFIRM FIRST: the procurement offer (supply-and-manage / lifecycle / resale). Slide 7 is written neutrally until confirmed. No Lenovo or Dell logos on the images; brand names can go in the caption if approved.

WEEK 5 · MON 30 NOV ONWARD · FINOPS

Your AWS cost-control checklist

The five-point plan to review your own cloud cost. The useful takeaway, given away free.

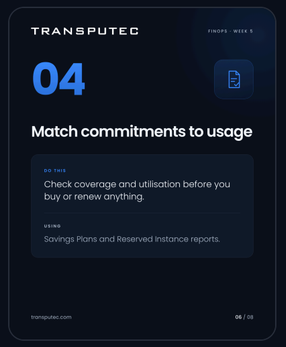

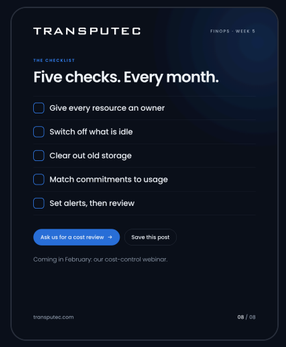

DRAFT POST COPY

A free checklist for your next monthly cloud review.

1. Give every resource an owner
2. Switch off what is idle
3. Clear out old storage
4. Match commitments to usage
5. Set alerts, then review

Each check takes minutes in the AWS console. The value is in doing it every month. Save this, and share it with whoever owns your AWS bill.

More on this in our February cost-control webinar.

#FinOps #AWS #CloudCosts #Checklist

FORMAT · POSTING NOTES

Carousel, 8 slides. Designed to be saved and shared. Use as the bridge into February webinar promotion.

BEFORE SCHEDULING

Confirm first

Week 4 offer

Which procurement offer leads: supply-and-manage, full lifecycle, or resale. Slide 7 and the post's final line are neutral until this is set.

Final copy

Draft copy here is for layout. Swap in the approved copy before scheduling. Keep it free of em dashes.

Stats in captions

Any figures added to captions need a named, dated source.
